

MACHINE FOR ROLLER BLINDS

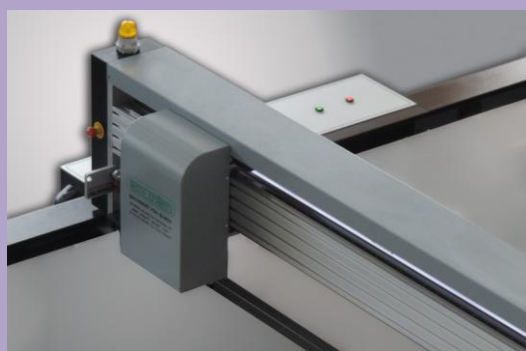

TR 3500/P

Automatic Plotter table for cutting fabrics for roller blinds, awnings, insect screens, panels and Roman Shades. Equipped with double cutting system, ultrasonic and Crash Cut on 2 Axes. (X and Y) with automatic laying of the fabric. Touch Screen computer with software for optimization of waste; storage of cutting parameters for every type of fabric.

Control panel

Ultrasonic and Crush cutting head

SOME IMPORTANT FEATUERS ARE:

- Automatic laying of the fabric.
- Worktop in stainless steel.
- Possibility of entering orders via barcode.
- Transversal cutting length 3.5 meters.
- Longitudinal cutting 5.8 meters.
- On request can be inserted a storage carrousel for the coils of fabric under the working surface
- All functions are controlled by the industrial PC
- Emergency buttons
- All mechanic, electronic and pneumatic parts are guaranteed by UNI norms
- Machine TR 3500/P has been built and designed according to CE norms

Storage carrousel for fabric coils

DIMENSIONS AND WEIGHT

- Length 7350 mm
- Height 1650 mm
- Width 5050 mm
- Weight about 3500 Kg.

TECHNICAL SPECIFICATIONS

- Electric supply 220 V – 50/60 HZ
- Average electric consumption: 3 KVA
- Air supply : 6 BAR
- Average air consumption: about 60 lt/min
