

MACHINERY FOR SHEER VERTICAL BLINDS

TST 3000

TST 3000 is the only machine on the market capable of producing sheer vertical blinds in a totally automatic cycle. The machine cuts the sheets to size, applies the stiffening tape on the upper side and if required also on the lower side of the sheet, to give more compactness and rigidity to the blind. Automatic application by ultrasonic welding of the top hangers, specially developed to be housed in pairs in the same hook's headrail. The production cycle allows you to produce a complete sheet in less than thirty seconds.

PAPER REWINDER

Double motorized reel holder with pneumatic expansion locking. The fabric reel is inserted into the first one. The second one is meant to rewind the protective paper.

TOP HANGERS FEEDER

Double automatic feeder for top hangers with adjustable positioning according to the width of the fabric being processed. Suitable reel sizes from 33 to 41 centimetres.

BOTTOM SLAT STIFFENER

Automatic application of the stiffening tape on the top and bottom of the sheet.

TECHNICAL FEATURES

- Maximum cloth length: 3.5mt
- Electric supply: 220V 50HZ
- Air supply: 6 bars
- Power supply 3kw

DIMENSION AND WEIGHT:

Lenght	7250 mm
Width	1350 mm
Height	1600 mm
Weight	1140 kg
